

WEEK-4-PROGRAMMING PARADIGM LABORATORY (CEF2111)

Exp No: 4

Date: 21-August-2016

STUDENTS NEED TO SUBMIT THE FOLLOWING PROGRAMS

Mandatory Submission Format:

- For every **program**, use the following order: **AIM** → **PROGRAM** → **OBTAINED OUTPUT**
- **Important:** Every program must display the **Student Name and Roll Number** in the output.

Experiment 4.1: To find the sum of all even digits in a given positive integer using **Direct Recursion**.

Experiment 4.2: To generate and display prime numbers within a given range using **Indirect Recursion**.

Experiment 4.3: To classify a given number as even or odd using **Mutual Recursion**.

Experiment 4.4: To find the maximum element in an array using **Tail Recursion**.

Experiment 4.5: To reverse a given string using **Non-Tail Recursion**.

Experiment 4.6: To display the elements of an array in reverse order using **Head Recursion**.

Experiment 4.7: To evaluate a recursive function using **Nested Recursion**, where the result of one recursive call is used as the argument of another recursive call.

Experiment 4.8: To find the sum of all elements in an array using **Linear Recursion**.

Experiment 4.9: To find the frequency of a given element in an array using **Binary Recursion**.

Experiment 4.10: To display all the elements of a linked list using **Structural Recursion**.

*****THE END*****
